OUR OWN PRODUCE

DIAR IL-BNIET PRIDES ITSELF IN ITS USE OF HOME-GROWN PRODUCE, FRESHLY PICKED FROM THE FAMILY-RUN FARM.

The estate consists of over 600 acres of land covered in rich, dark soil, which is religiously cultivated.

In winter the fields take on a dark green coat as mainly leafy vegetables, cucumbers and the like are grown. Whilst in the warmer months, bright shades of reds, yellows and oranges colour the land, as it takes on the vibrant tones of strawberries, peaches and other summery fruit and vegetables. The fruit from these groves is used as main ingredients for many of our desserts and dishes. Some are also soaked in a delicious syrup and sold in our farm shop as varied home-made preserves and multifloral honey, which is derived from the bee-hives that hang at Dingli cliffs.

Our olive grove is bursting with olive trees, some of which date back to the 12th century. The olives are organically grown, using no pesticides whatsoever. They are then pressed and bottled on the spot, producing thick, unfiltered olive oil. The estate is also home to vineyards of Girgentina and Gellewża, indigenous Maltese grapes, which are used to make our selection of smooth house wines, for which we often hold tasting event

ANTIPASTI HAMPER
